

MellowYak Phase 6 — Desktop Productization

English base + Hebrew RTL · synthetic public fixture data

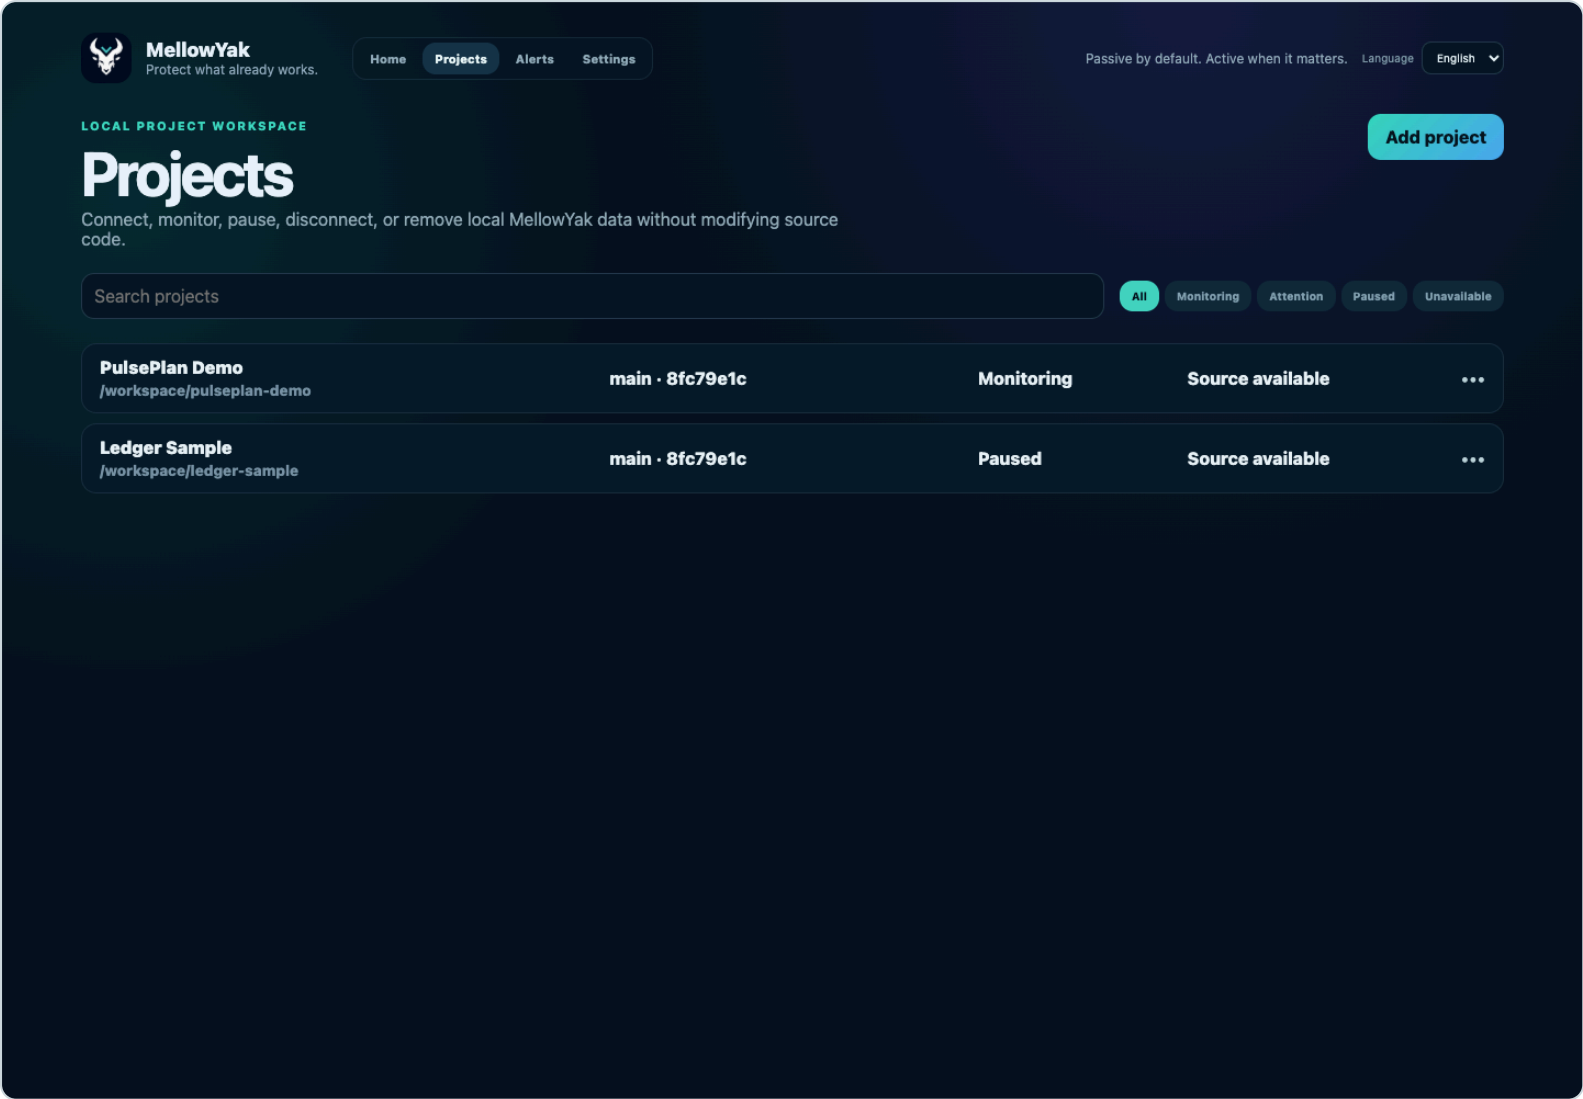

1. Command Center — English

What is shown: Global project metrics, actionable alerts, project health, and recent verified outcomes.

Available actions: Open a project, all projects, or the alerts inbox.

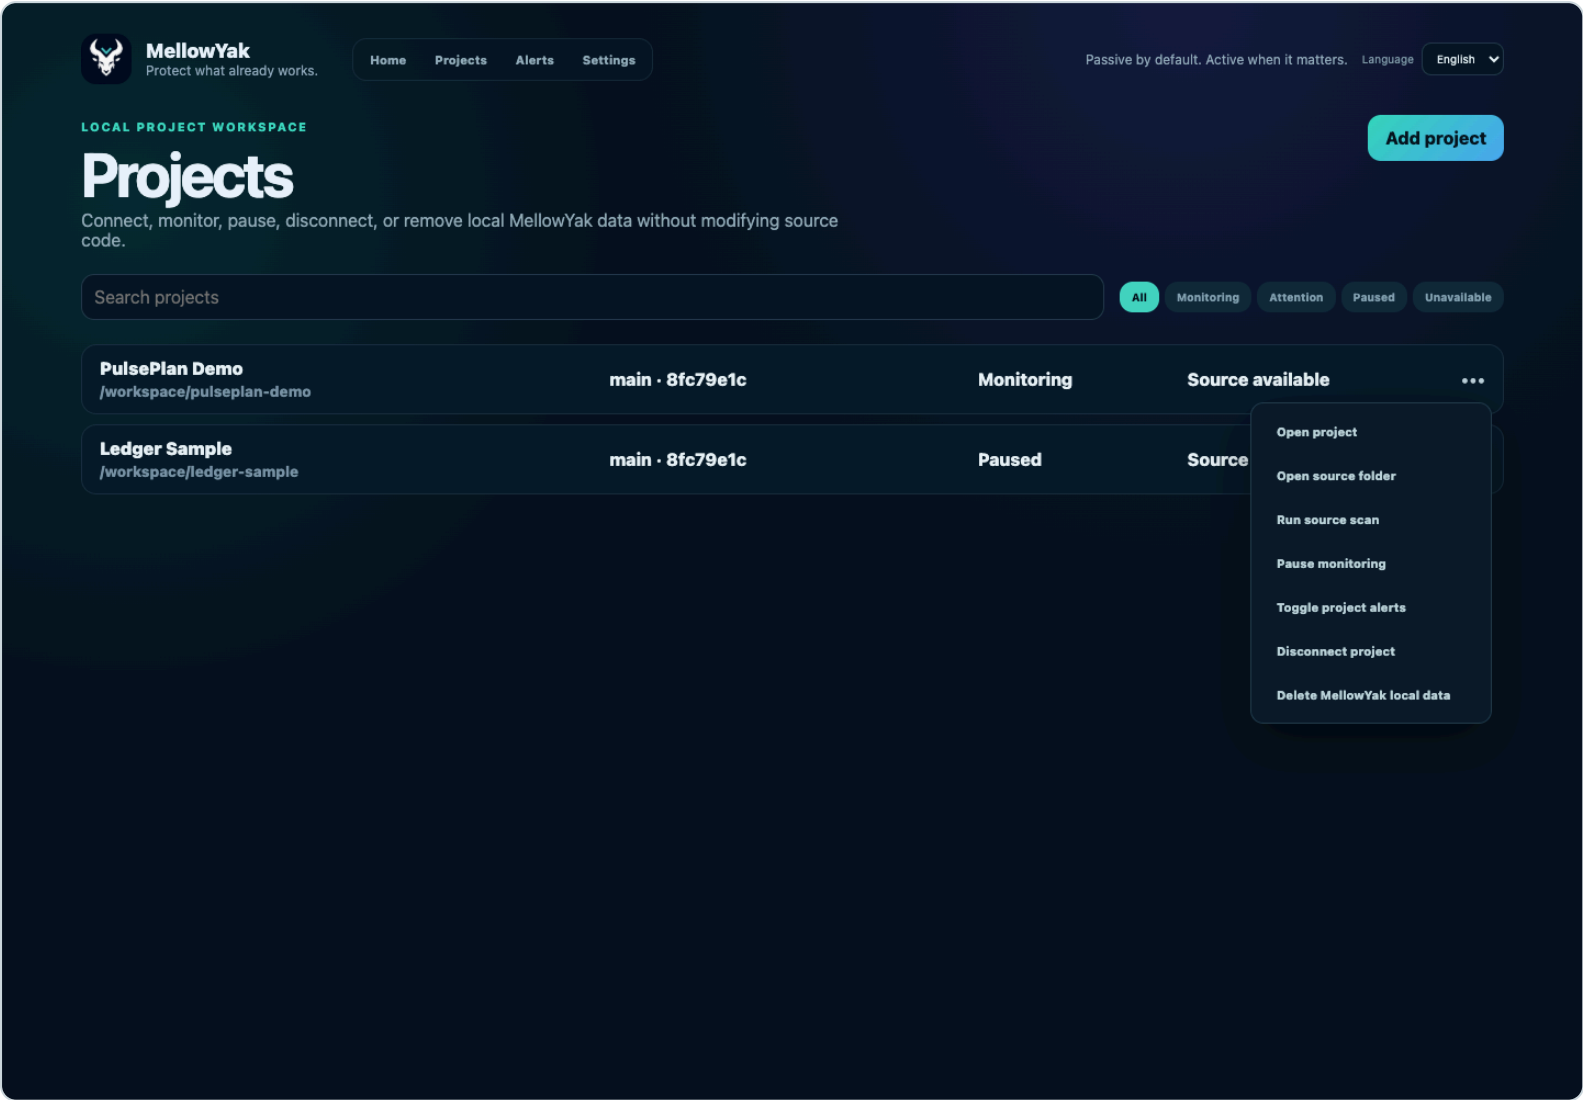

2. Projects — English

What is shown: Searchable and filterable project lifecycle table.

Available actions: Search, filter, add, open, or reveal project actions.

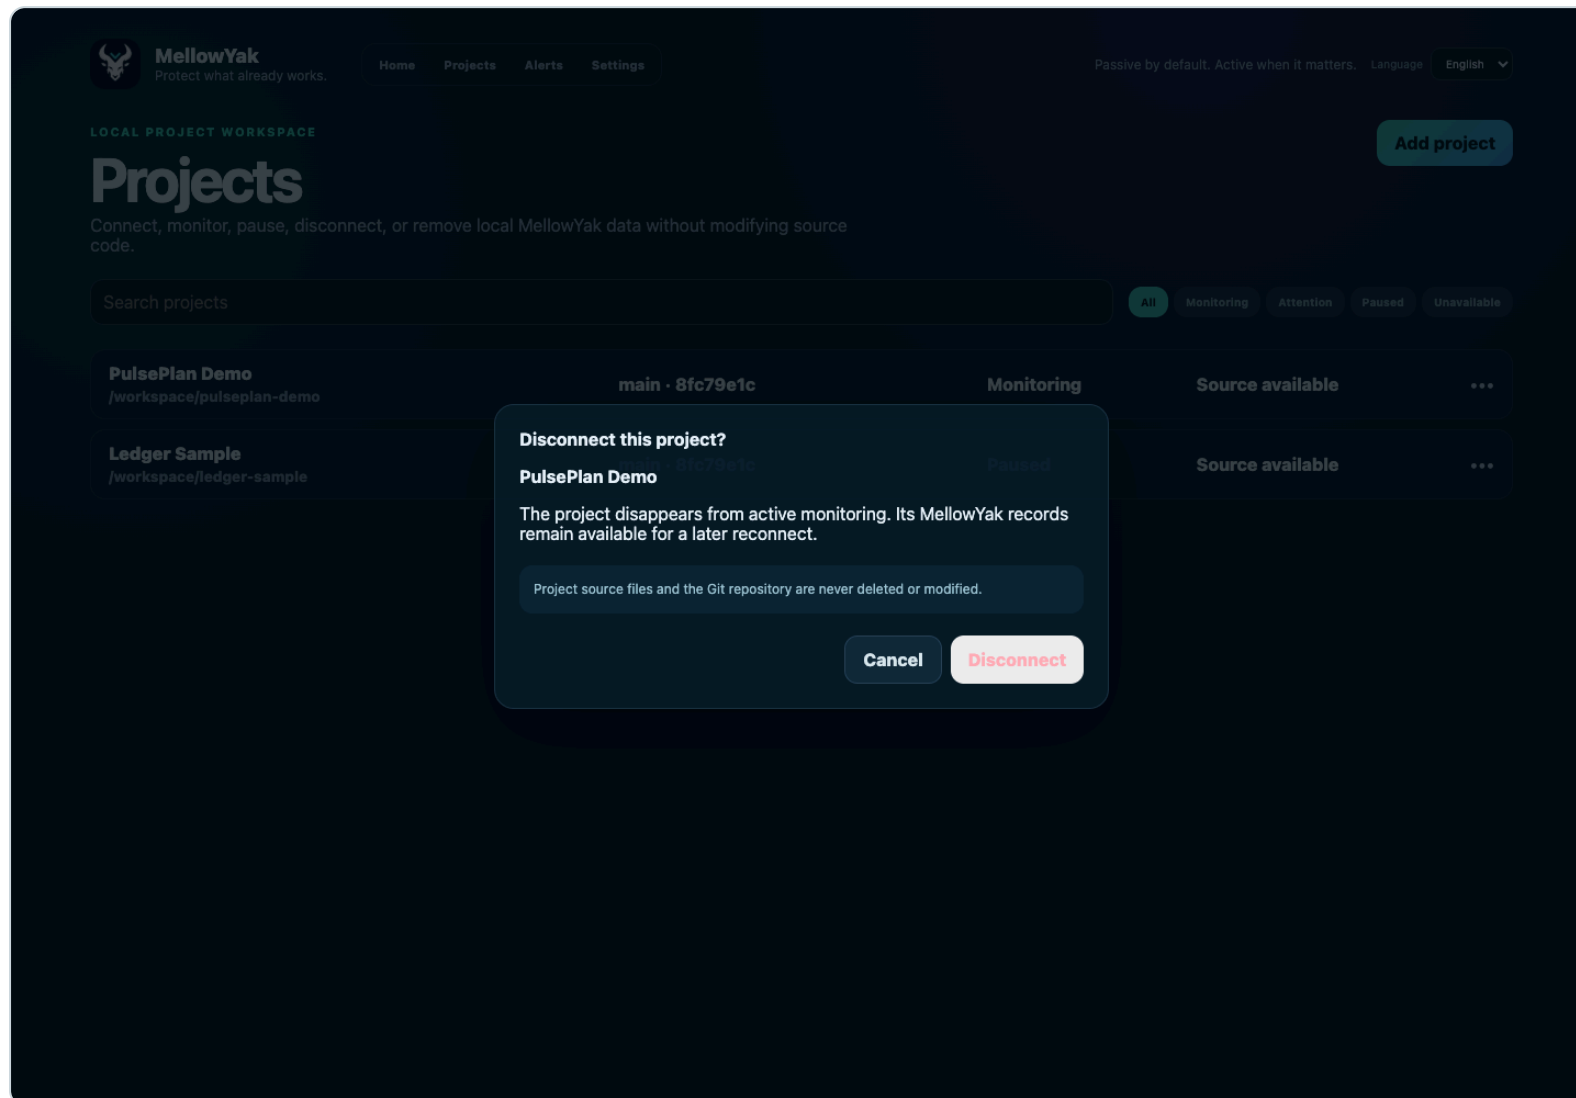

3. Project action menu — English

What is shown: Bounded project operations with destructive actions visually separated.

Available actions: Open, reveal source, scan, pause, mute, disconnect, or delete local data.

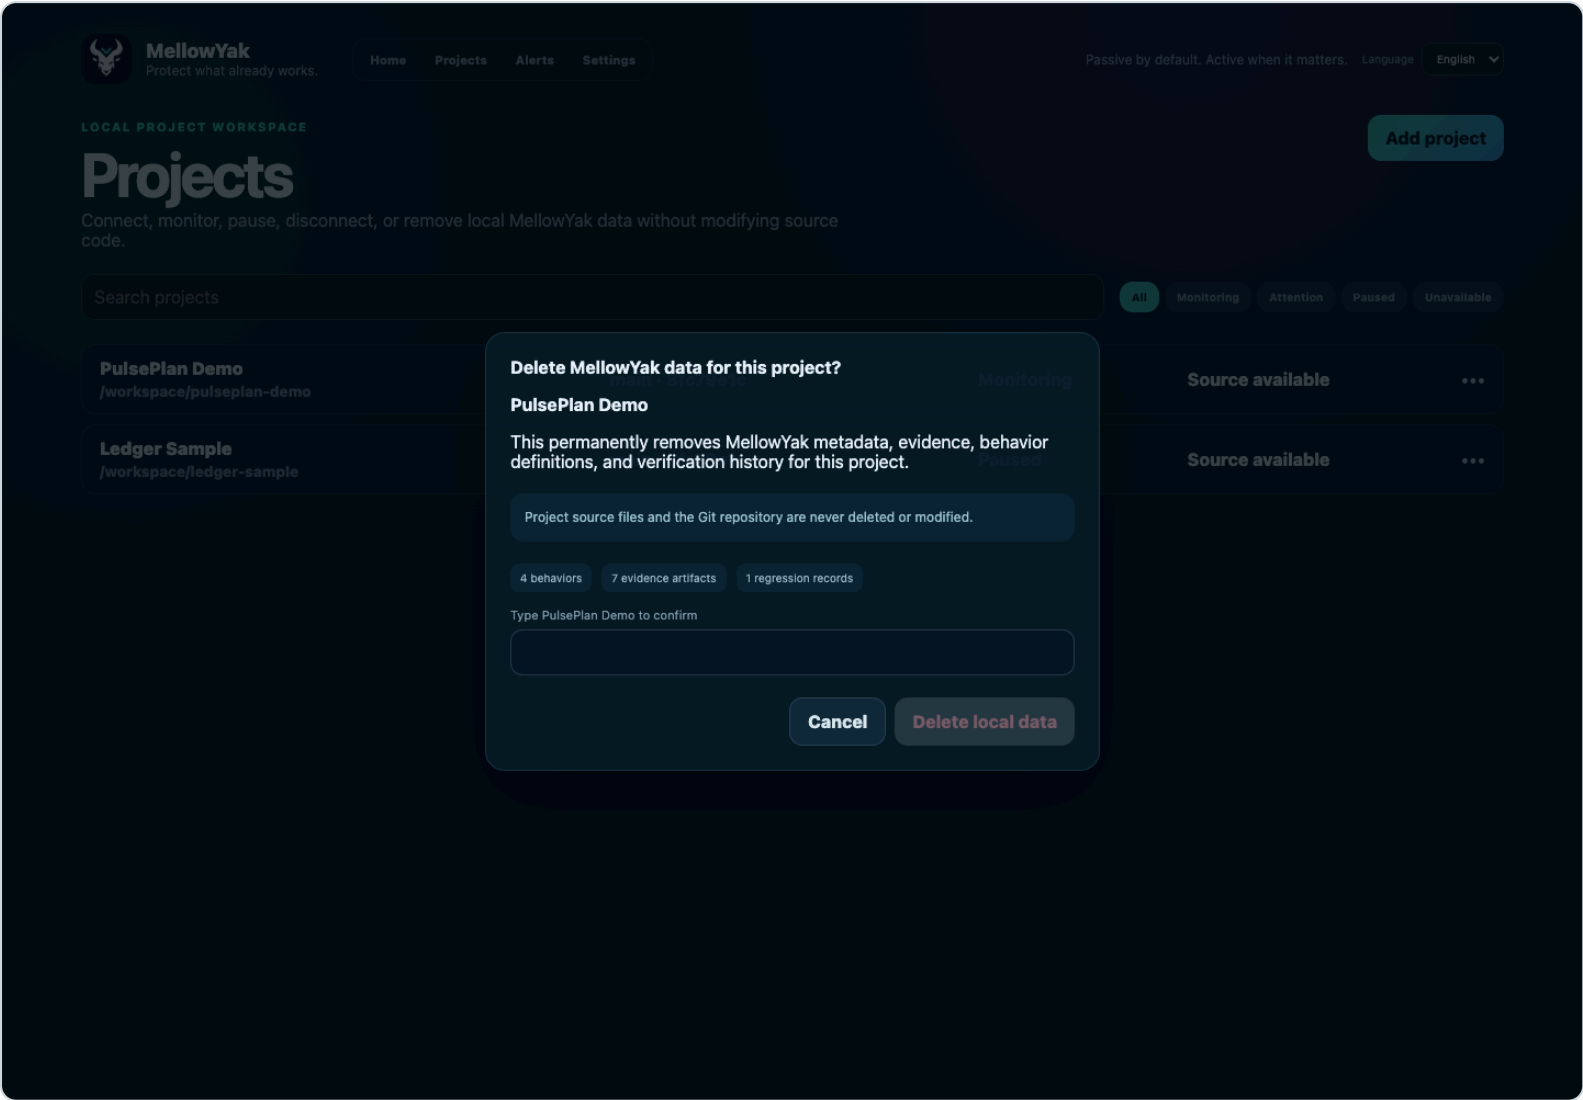

4. Disconnect confirmation — English

What is shown: Explains that monitoring stops while MellowYak records and source remain safe.

Available actions: Cancel or disconnect.

5. Delete local data confirmation — English

What is shown: Shows the local records affected and requires the exact project name.

Available actions: Cancel or permanently delete only MellowYak project data.

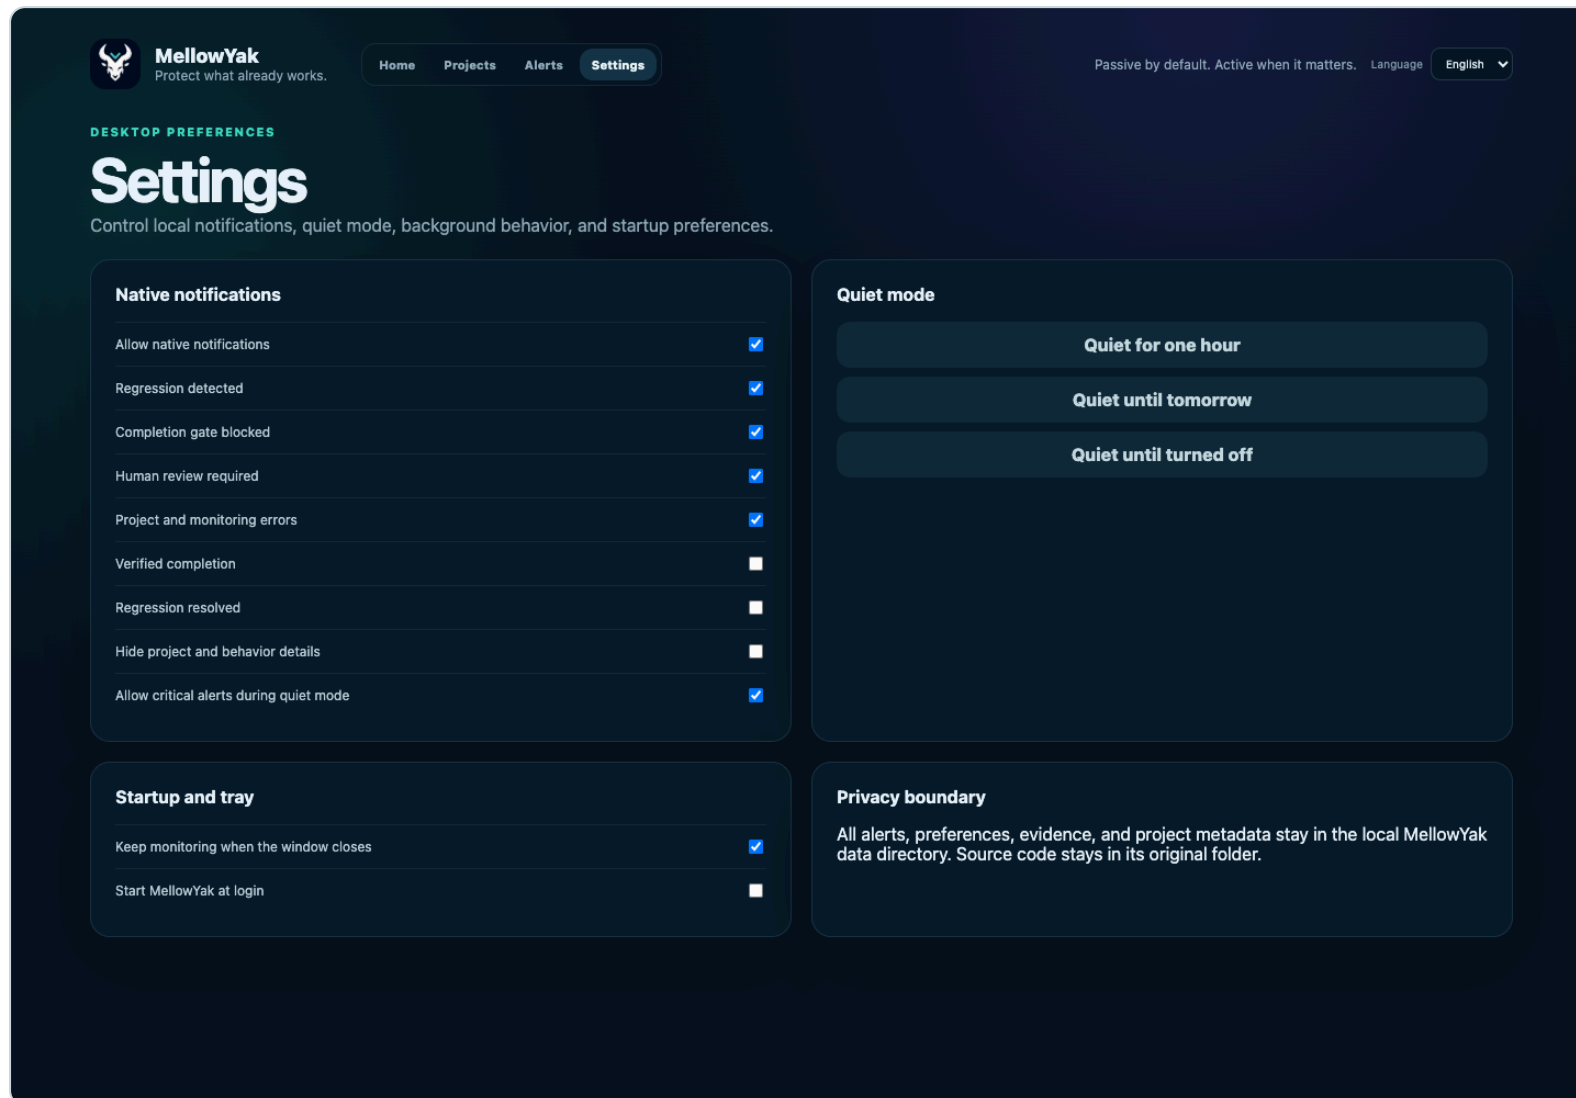

6. Alerts Center — English

The screenshot shows the MellowYak Alerts Center interface. At the top left is the MellowYak logo with the tagline "Protect what already works." and navigation links for Home, Projects, Alerts (selected), and Settings. On the top right, there is a status indicator "Passive by default. Active when it matters." and a language dropdown menu set to "English". Below the navigation bar, the section is titled "LOCAL ACTIVITY INBOX" with a "Clear resolved" button. The main heading "Alerts" is followed by a description: "Durable, deduplicated project events with direct routes to the relevant local context." Below this are filter tabs: "All" (selected), "Unread", "Attention", and "Resolved". The alert list contains three items: 1. "CRITICAL Regression detected" with details "A protected behavior changed for PulsePlan Demo." and timestamp "8/24/2026, 3:04:00 PM", with actions "Open", "Mark read", and "Resolve". 2. "HIGH Completion gate blocked" with details "Known required checks are not complete for PulsePlan Demo." and timestamp "8/24/2026, 3:05:00 PM", with actions "Open", "Mark unread", and "Resolve". 3. "INFO Verification completed" with details "Known required checks completed for Ledger Sample." and timestamp "8/24/2026, 2:03:00 PM", with actions "Open" and "Mark unread".

What is shown: Persistent regression, gate, and resolved outcome records.

Available actions: Filter, open context, mark read or unread, resolve, and clear resolved.

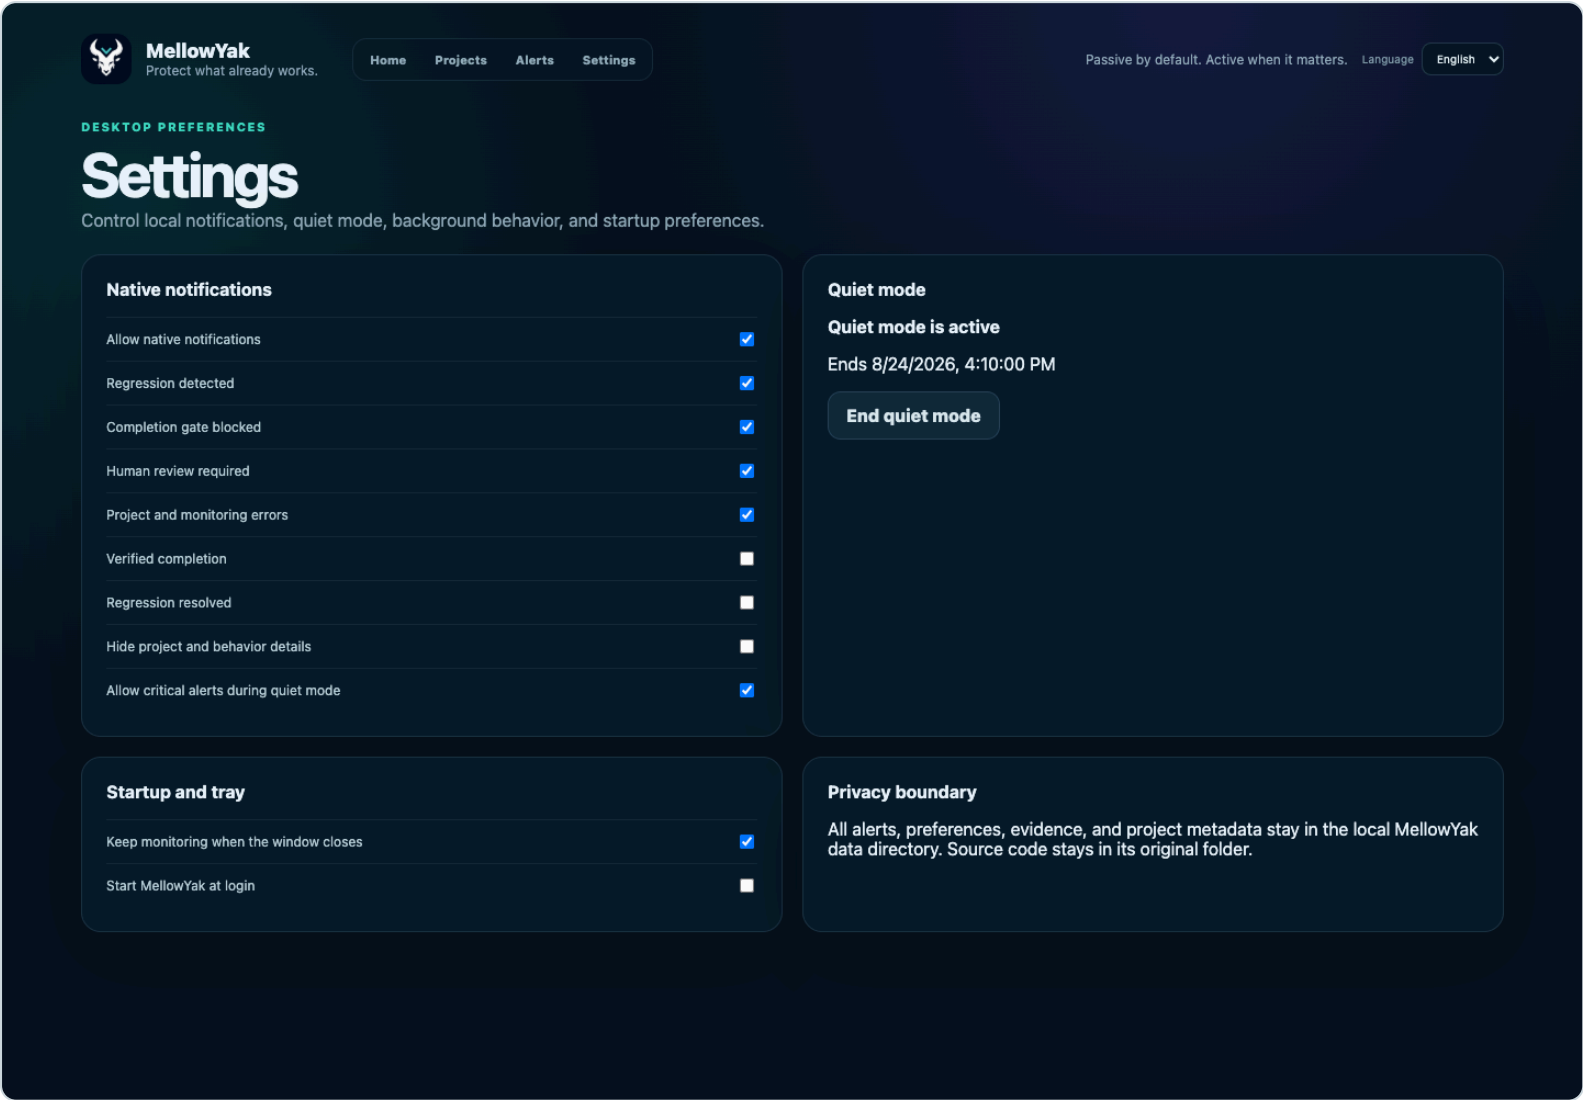

7. Settings — English

What is shown: Native notification categories, privacy detail controls, quiet mode, background close, and login startup.

Available actions: Toggle alert categories, quiet mode, background lifecycle, and start at login.

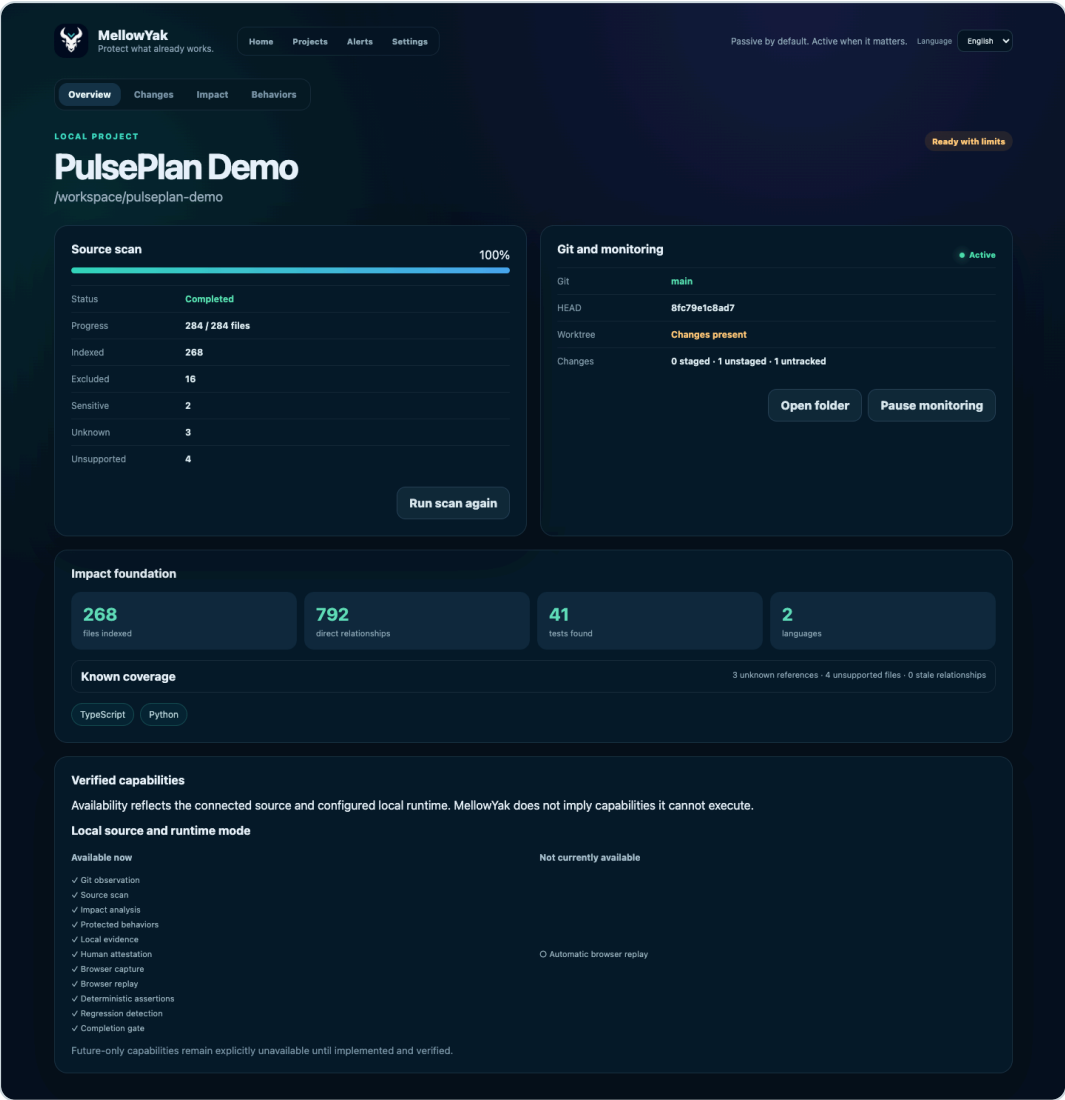

8. Quiet Mode active — English

What is shown: Persistent time-bounded suppression state with an explicit end action.

Available actions: End quiet mode.

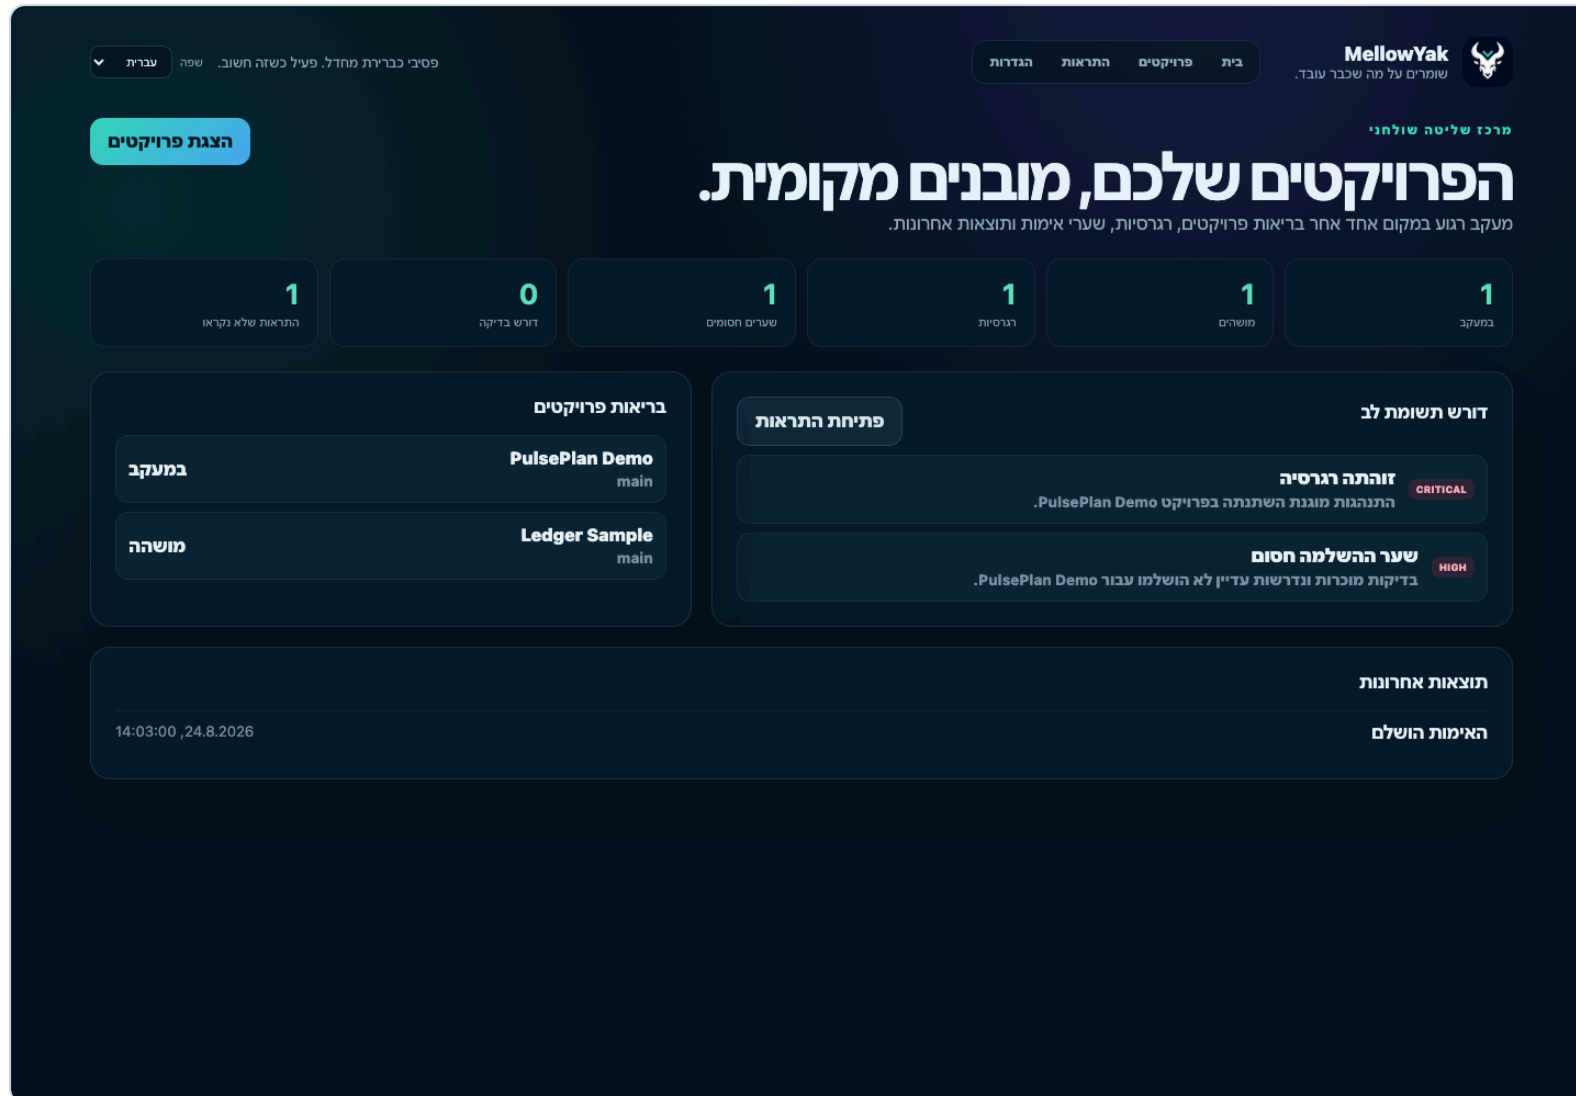

9. Project capabilities — English

What is shown: Truthful available and unavailable features for a local source plus runtime.

Available actions: Review source scan, Git, impact, evidence, replay, regression, and gate availability.

10. Command Center — Hebrew RTL

What is shown: The complete command center mirrored and translated right-to-left.

Available actions: Open projects, alerts, and project context.

11. Projects — Hebrew RTL

פסיכי כברירת מחדל. פעיל כשזה חשוב. שפה עברית
